

REMARKS:

Claims 1-25 are in the case and presented for consideration.

In response to the restriction requirement, Applicants elect the prosecution of claim 4 where each of the groups A, A', B, B', R, R', X and X' of the platinum complex have been specifically identified. Also see the bottom of page 5 of the specification for the corresponding formula.

This election is made with traverse to the extent that a generic or at least a more generic claim might be found allowable than claim 4 alone. To this end, claim 1 has been identified as generic so that examination of claim 1 is also respectfully requested.

Examination of claim 4 is requested and also examination of newly presented claims 20-25 is requested where each of the groups of the complex are identified in conformance with the election but with the other groups left as they are stated in claim 1. In other words, claim 20 limits the group A to being an ammonia molecule but the other groups A', B, B', etc. are left as defining claim 1. Accordingly, examination of the added dependent claims 20-25 are also requested.

In any case, if a claim that is more generic than the elected claim 4 is found allowable, Applicants reserve their right to have any claims that further narrow such an allowable claim to be rejoined even if they were not part of the election and, in any case, Applicants reserves their right to file a divisional application covering any non-elected species.

The Examiner is respectfully invited to telephone the undersigned in order to further expedite the prosecution of this application as needed.

Entry of this amendment and favorable action is respectfully requested.

Respectfully submitted,

/PETER C. MICHALOS/
